PROFESSIONAL SUMMARY

Data Analyst with a Computer Science & Engineering background and hands-on experience in data collection, cleaning, validation, and analysis using Python (Pandas, NumPy, Seaborn, Matplotlib), SQL, Excel, and Power BI. Proven track record improving data accuracy through rigorous QA and statistical analysis, identifying trends and root causes, and translating findings into interactive Tableau and Power BI dashboards. Experience leading a field team of 3 to deliver audited, deadline-driven data across multiple project sites.

KEY ACHIEVEMENTS

- Reduced field data error rates by approximately 15% by designing and enforcing a QA/audit checklist adopted across a 3-member team.
- Delivered accurate, audited datasets across 10+ project sites under strict deadlines with zero missed submissions.
- Built 2 end-to-end Python data pipelines (agriculture analytics + web application) using Pandas and NumPy for cleaning, feature engineering, statistical analysis, and visualization with Matplotlib and Seaborn.

TECHNICAL SKILLS

Programming & Query Languages: Python (Pandas, NumPy, Seaborn, Matplotlib), SQL
Data Analysis & Visualization: Power BI, Tableau, Excel (Pivot Tables, VLOOKUP, Advanced Formulas), EDA, Statistical Analysis, Statistics, Trend & Root-Cause Analysis, Ad-hoc Reporting
Databases & Tools: MongoDB, Git, GitHub, VS Code, Jupyter Notebook, REST APIs, Version Control, Debugging
Also: Data Cleaning & Validation, KPI Tracking & Reporting, Dashboard Development, Data Storytelling, Business Intelligence, Quality Assurance & Audit, Stakeholder Collaboration, Process Improvement, Prompting and Generative AI (no-code)

WORK EXPERIENCE

Field Data Associate — Genesys International Corporation Ltd. *Feb 2023 – Jun 2023*

- Collected and validated field data using high-precision GPS hardware, running QA and audit checks in Excel before uploading records, reducing data error rates by approximately 15%.
- Applied statistical analysis to quantitative and qualitative field records across 10+ project sites to identify trends and determine root causes of data discrepancies.
- Led a 3-member field team, defining daily task scope, goals, and deliverables while serving as the primary point of contact for data-quality issue resolution.
- Maintained daily operational logs, status reports, and documentation, collaborating with cross-functional stakeholders to meet strict project deadlines.

PROJECTS

Crop Care & Farming Assistance System — Data-Driven Agriculture Platform

- Performed end-to-end data validation, cleaning, and feature engineering on agricultural datasets using Python (Pandas, NumPy), improving backend data integrity for real-time crop-care recommendations.
- Designed visual reporting dashboards using Matplotlib and Seaborn, translating statistical analysis into clear, actionable insights for non-technical users.

LearnHub — Data-Backed Web Application

- Built and queried a structured MongoDB data layer with REST API routes and full CRUD operations, maintaining clean documentation and version-control workflows.
- Analyzed application log data using Python and SQL to debug and validate system behavior, improving overall system reliability.

EDUCATION

B.Tech, Computer Science & Engineering — Brindavan Institute of Technology and Science (70%), 2023 – 2026
Diploma in Mechanical Engineering — Brindavan Institute of Technology and Science (71%)
Secondary School Certificate (SSC) — Zilla Parishad High School, P. Muchumarri (90%)

CERTIFICATIONS

- NPTEL Online Certification: Cloud Computing — IIT Madras
- NPTEL Online Certification: Advanced Computer Architecture — IIT Madras
